FOR IMMEDIATE RELEASE

Student Workforce Innovation Movement (SWIM) Launches Across Africa.

Ghana, February 26, 2026 — The Student Workforce Innovation Movement (SWIM) is closing the global education and employment gap.

How Will This Be Accomplished? A technological ecosystem that connects students to corporate and industry-specific projects, professional certifications, and verified career pathways. The end goal is to enable students to earn income, gain real-world work experience, and build credentials before they graduate.

With SWIM's official launch being less than three weeks away, momentum continues to build behind its mission. The organization is supported by an exceptional team of ambassadors, all recognized as "Current and *Future African Leader Award Winners*," who are championing the initiative across regions:

- Dr. Jacqueline Mohair — Global Ambassador (US)
- Clinton Argo Agyemang — Global Ambassador (Ghana)
- Israel Majak Yel — Cross Continental Digital Ambassador
- Collins Mwangi Karungu — Eastern Realm Ambassador
- Azaria Tendayi Chidzundu — Central Realm Ambassador
- Katleho Mojakisane — South Africa Ambassador
- Amanpeni Kofi Prince — Administrative & West Africa Ambassador
- Ndagire Grace — Global Ambassador

SWIM's growing visibility is supported through media collaborations with UTV, ONUA TV, TV XYZ, and HOLY TV. The initiative is also backed by strategic sponsors, including Insight Communication Group International (ICGI), ACRELS — African Continent Real Estate/Listing Service, WCP Consulting & Communications, iTECH SPORTZ, and Carolina Christian College.

SWIM (Student Workforce and Innovation Movement) is a dynamic workforce development initiative that is redefining how students engage with others from around the globe, and with real-world professional opportunities. SWIM exists to close the gap between academic learning and practical experience by connecting talented students with paid, structured innovation projects and workforce challenges across industries and continents.
